Strath Plays: Discord Games

The theme for this challenge is “Discord Games”. A discord game is a small multiplayer game where communication is a gameplay mechanic of the game. It can be collaborative or competitive.

Examples of discord games are Peak, Among Us, and Mecha Chameleon.

Build a game that you feel fits the theme in some way, it is open to interpretation and can be approached in a wide variety of ways.

How can you use communication to develop an interesting game?
